

The Causeway

A proposed 18-month trial closure to vehicles

The case for a trial closure.

The Causeway is a unique feature of Earlswood Lakes. Currently it serves as a single-lane road, which can create conflicts between vehicles, pedestrians, anglers, equestrians and cyclists.

We are considering an 18-month trial closure to vehicles to unlock the true potential of the lakes as a safe, peaceful amenity for everyone.

Current users

Why this matters

**Safer
Amenity**

A dedicated space for walkers, joggers, cyclists, anglers and equestrians — free from passing traffic.

**Nature
First**

Less noise and pollution around the lakes — better for local wildlife and a more serene environment.

**18-Month
Trial**

We will actively monitor usage, gather feedback and assess impact before any permanent decisions.

Why not introduce barriers?

Wireless barriers for local residents have been considered and ruled out. They are costly to install and maintain, carry significant vandalism risks, and face legal obstacles deemed unworkable in this setting.
